About Us

Name **SEKISUI CHEMICAL CO., LTD.**

Establishment **March 3, 1947**

Paid-up Capital **¥100,002 million**

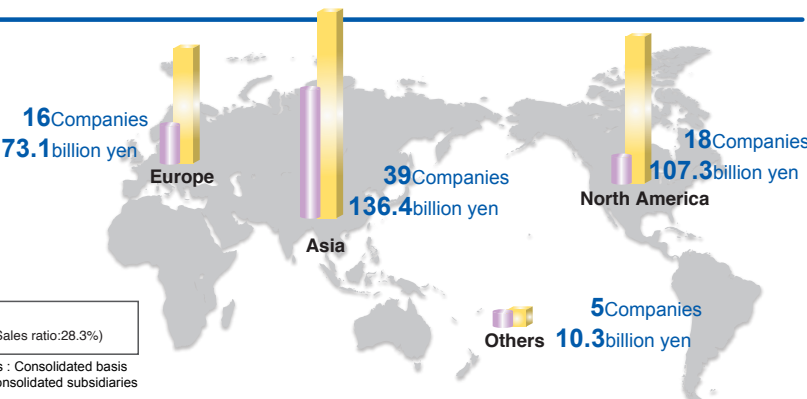

Number of Employees **26,419**
(for the term ending March 2022)

Corporate Headquarters **Tokyo**

International Sales
Number of affiliated companies

● Total international companies: 78
● Net Sales: 327.3 billion yen (international Sales ratio: 28.3%)

※ The term ended March 2022 / International Sales : Consolidated basis
Number of affiliated companies : Includes non-consolidated subsidiaries

Sekisui has top share in Japanese packaging tape market and covers distribution network all over Japan and also Asia and EU.

SEKISUI is committed to producing environmentally friendly products.

We have been selected as one of the Global 100 Most Sustainable Corporations in the World seven times.

"Global 100" is an index created and maintained by an Canadian company, Corporate Knights Inc. It evaluates sustainability of world's major companies in all industries from various perspectives such as environment, society, and governance (ESG), and selects the top 100 companies.

In 2022, Sekisui Chemical Co., Ltd. was selected for the seventh time, ranking in 22 companies.

Contributing SDGs through our business.

The Sekisui Chemical Group is committed to solving issues through our outstanding technologies and great quality to realize our group vision of "improving the lives of people around the world and the global environment" and to contributing to SDGs, which aim for a sustainable society.

SUSTAINABLE DEVELOPMENT GOALS

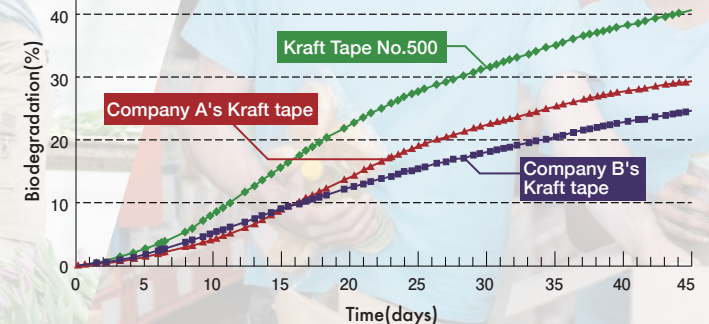

Kraft tape is made from "plant-derived (biomass)" raw materials.

Kraft tape is a biodegradable packing tape.

Sekisui Kraft Tape NO.500 is more biodegradable than other Kraft tapes, thus contributing to reducing environmental load.

REPLACE

Kraft tape has a high Biomass rate and can curb CO₂ emissions to greater extent than transparent tape made from petroleum (OPP tape).

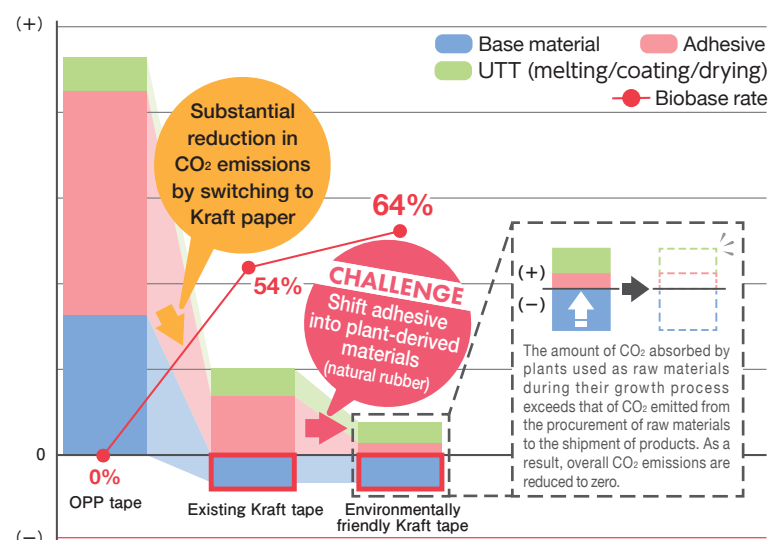

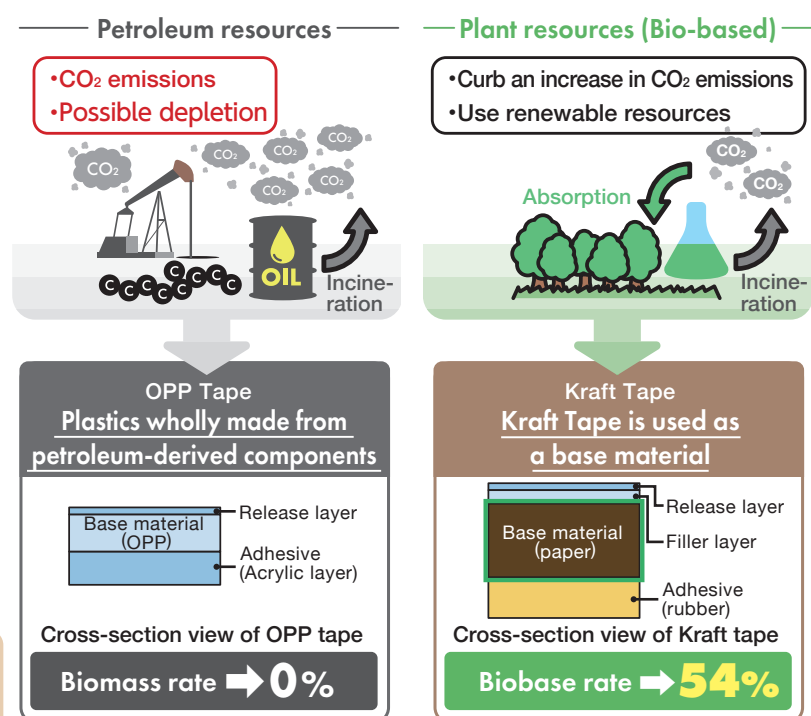

CO₂ emissions reduction

*Both OPP tape and Kraft tape tested for comparison are our products.

CO₂ emissions are reduced from raw material procurement to product shipment because the base material made of Kraft paper is of natural origin.

Biobase and Carbon neutral

CO₂ is naturally emitted when biomass is burned, but the CO₂ was originally absorbed from the atmosphere by plants in the process of growth. This means that the total amount of CO₂ emissions remains unchanged. Therefore, the use of products with a high bio-based content can reduce CO₂ emissions.

CHALLENGE

Produce environment-friendly tapes

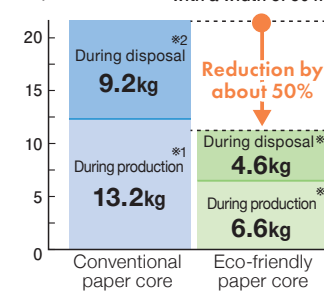

We are currently developing products with higher bio-based content by replacing the adhesive with natural raw materials. Please look forward to them.

REDUCE

All Sekisui's Kraft tapes feature an eco-friendly paper core. They can be crushed at the time of disposal, greatly reducing the volume of waste. CO₂ emissions generated during their production and disposal are also largely decreased.

Sekisui's Kraft tape contributes CO₂ emissions and waste reduction.

Comparison of CO₂ emissions of paper cores for 10 cases of Kraft tapes with a width of 50 mm and a length of 50 m

*1. In the calculation of CO₂ emissions, we assume that all paper cores are composed of "core base paper." CO₂ emissions were then calculated from the paper core weight of that material (core base paper), referring to the CO₂ emissions of "1.2 kg-CO₂" for "core base paper" in the "CO₂ emissions intensity table" published by the Center for Environmental Information Science in 2007.

*2. The CO₂ emission coefficient (0.84) is quoted from the "Environmental Household Accounting Booklet" published by the Ministry of the Environment, and the figures here are converted as combustible waste.

Let's crush it and throw it away.

Eco-friendly paper core
Light and resource-saving paper core

All of Sekisui Kraft tapes' paper cores are made of 100% recycled paper.

*As for Kraft tapes produced overseas, the use rate of recycled paper is more than 50 %.

RECYCLE

Sekisui uses recycled materials not only for our Kraft tape but also for other types of tapes. Our tapes are also in compliance with the Green Purchasing Law so that they are safe for use.

Recycled paper – 40% or more used –

•Ecora Pack Kraft Tape No.501
Among our tape series, this tape is an EcoMark-certified product, which uses more than 40% recycled paper.

Product compliant with the Act on Promoting Green Purchasing

Recycled PET – 40% or more used –

Ecora Cloth Tape

New Clear Cloth Tape No.784

Recycled PET Fiber used Cloth Tape No.6015

Fit Light Tape No.738

What is the Act on Promoting Green Purchasing?

It is a law that recommends that, when purchasing products and services, people should consider the environment, give careful thought to the necessity of those products and services, and purchase those with the lowest possible environmental impact (e.g., products compliant with the Act on Promoting Green Purchasing). The Act, enacted in 2000, mandates green purchasing by the national government and other organizations, and promotes green purchasing to local governments, businesses, and citizens to purchase.

CHALLENGE

Kraft tape for heavy objects

We are developing kraft tape that can be used for heavy objects for which tape has been difficult to use. We will also continue our research and development so that biomass-based tapes can be used in a variety of situations.
